CORNER OFFICE

# CORNER OFFICE

Today, everyplace is a workplace. And due to the constantly changing landscape of work, many times even our own offices can be as inconvenient, uninviting and distracting as anyplace else.

Corner Office is designed to enhance today's open plan offices and ad-hoc workplaces by providing one's own comfortable workstation within these dynamic environments. By providing power, light and workplace privacy all in one easy to set up unit, Corner Office brings heightened efficiency and well-being to any desk. When used singly, Corner Office provides a quiet alcove or touchdown space for one. When arranged in multiples, it provides individual privacy within larger, open shared spaces.

Corner Office represents a new type of product for today's new type of productivity.

CORNER OFFICE LIGHT

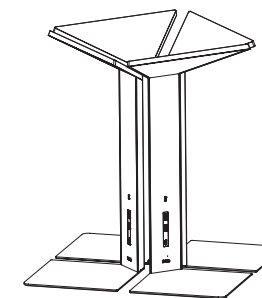

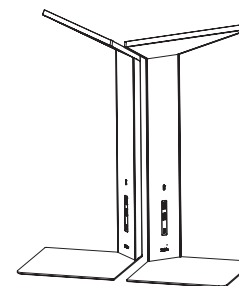

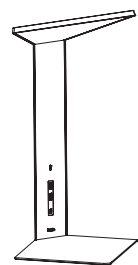

CORNER OFFICE 15

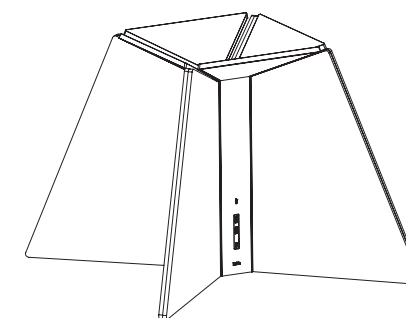

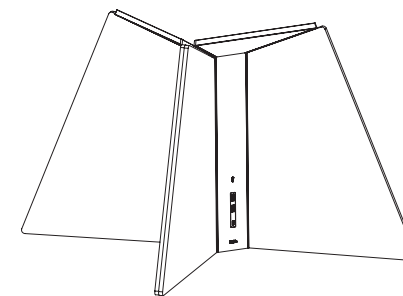

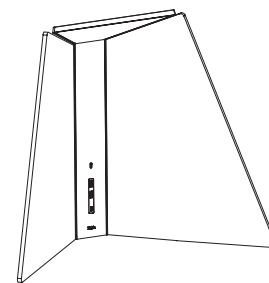

CONFIGURATIONS

Corner Office Light can be used alone, as a minimal, space efficient table lamp containing multiple device-charging ports. Corner Office 15 integrates the light with a semi-private acoustical corner panel and Corner Office 30 incorporates a larger panel all the features necessary for head down, intensive work.

## DESCRIPTION

Corner Office is systemic and flexible, offering various degrees of privacy and power provision. The system comprises three elements: a glare-free, fully dimmable LED corner task light that incorporates power ports featured in its armature; a set of optional acoustic deterrent fabric panels; and an optional pocket accessory that provides a place to store a phone or tablet, keeping things clutter-free. Easily reconfigurable, the system is lightweight and requires no tools to assemble or install.
