II

– Apparecchio in classe II - Apparecchio nel quale la protezione contro la scossa elettrica non si basa unicamente sull'isolamento principale ma anche sulle misure supplementari di sicurezza costituite dal doppio isolamento o dall'isolamento rinforzato – Fixture class II. A fixture where protection against electric shock does not rely only on the main insulation but also further safety measures involving double insulation or reinforced insulation – Leuchten der Schutzklasse II. Gerät, bei dem der Schutz gegen Stromschläge nicht nur auf der Hauptisolierung beruht, sondern auch auf zusätzlichen Sicherheitsmassnahmen, die in einer doppelten Isolierung oder einer verstärkten Isolierung bestehen – Luminaire classe II. Luminaire dans lequel la protection contre le choc électrique ne se base pas uniquement sur l'isolation principale, mais également sur les mesures de sécurité supplémentaires constituées d'une double isolation ou d'une isolation renforcée – Aparato de clase II. Aparato en el que la protección contra la sacudida eléctrica no se basa únicamente en el aislamiento principal sino también en las medidas adicionales de seguridad constituidas por el aislamiento doble y el aislamiento reforzado – Изделие II класса - Изделие, в котором защита от удара током основывается не только на главной изоляции, но и на дополнительных мерах безопасности, состоящих из двойной или укреплённой изоляции –

III

– Apparecchio in classe III. Apparecchio in cui la protezione contro la scossa elettrica si basa sull'alimentazione a bassissima tensione di sicurezza e in cui non si generano tensioni superiori alla stessa. Nota: un'apparecchio in classe III non deve essere provvisto di messa a terra di protezione – Fixture class III. A fixture where protection against electric shock depends on the very low and safe voltage supply, guaranteeing no higher voltage levels are generated. N.B. a Class III fixture does not necessarily require grounding protection – Leuchten der Schutzklasse III. Gerät, bei dem der Schutz gegen Stromschläge auf der Speisung mit sicherer Niedrigstspannung beruht und in dem keine Spannungen erzeugt werden, die über der Niedrigstspannung liegen. Hinweis: Ein Gerät der Klasse III macht keine Erdung erforderlich – Luminaire classe III. Luminaire dans lequel la protection contre le choc électrique est basée sur l'alimentation en très basse tension de sécurité et qui ne présente pas de tensions supérieures à la tension de sécurité. Remarque: un luminaire de classe III ne doit jamais être relié à la terre de protection – Aparado de clase III. Aparato en el que la protección contra la sacudida eléctrica se basa en la alimentación a muy baja tensión de seguridad y en el que no se generan tensiones superiores a ella. Nota: un aparato de clase III no tiene que estar provisto de puesta a tierra de protección – Изделие III класса. Изделие, в котором защита от удара током основывается на питании от очень низкого напряжения. Замечание: Изделие III класса не требует наличия защитного заземления –
