Collezioni

Il presente Catalogo raccoglie tutte le collezioni realizzate da Axolight.

La sequenza delle pagine segue un ordine legato principalmente al tipo di materiale di base di cui si compone la collezione: metallo (p. 26 – 179), vetro (p. 180 – 243), tessuto (p. 244 – 317).

L'ultima parte del Catalogo (p. 308 – 317) è invece dedicata alla descrizione delle caratteristiche tecniche delle collezioni e delle proprietà fonoassorbenti.

This Catalog gathers all the standard collections by Axolight. The sequence of the pages follows an order related to the material that defines each collection: metal (p. 26 - 179), glass (p. 180 - 243), fabric (p. 244 - 317).

The last part of the Catalog (p. 308 - 317) is instead dedicated to the description of the technical features of the collections and their sound absorbing properties.

bul-bo

Gabetti & Isola

The **Bul-Bo** lamp belongs to the series of designs created by the **Olivetti Residential Center** in Ivrea (1968-1971). The firm **Gabetti e Isola** (Roberto Gabetti, Alvaro Gabetti, and Luciano Re) between 1968 and 1971. The designers worked as still strongly influenced by the mind of Adriano Olivetti, who died a few years before the creation of Bul-Bo, a playful, ironic and creative, in perfect coherence to that of the "schemes" which, in the second half of the 20th century, was born in cities around the landscapes definitively gave way to the - the Gabetti e Isola studio started the project of the Olivetti Residential Center in Ivrea, a residential solutions (designed for the era) of the most important companies in the world, whose legacy is the idea of a new way of living.

In 1968 - when one of the most disruptive of the 20th century was born in cities around the landscapes definitively gave way to the - the Gabetti e Isola studio started the project of the Olivetti Residential Center in Ivrea, a residential solutions (designed for the era) of the most important companies in the world, whose legacy is the idea of a new way of living.

"To create the new Bul-Bo, a lamp already in the Axolight team - and to apply contemporary production processes to it, we found it very difficult to an extremely emotional maieutics exercise. Having given a second life to a lamp so in line with modern design - which, fifty years after its creation, is still strong, non-conforming, free and proud, thrilled and enriched". In devotion, Axolight set itself the goal of recreating its original form, but able to fulfil its mission.

Bul-Bo was the illuminating flag around which the accessories made by the Gabetti e Isola firm no longer tied to the walls, as per tradition.

Bul-Bo fu e rimane un oggetto di rottura con il passato. Questa lampada venne pensata per contribuire a dare vita a un ambiente residenziale di ispirazione schilleriana: ludico, libero e ad apportare un benessere psicofisico a chi vive nel Centro Residenziale Olivetti.

Bul-Bo was and remains an object of a break with the past. This lamp was designed to help create a residential environment inspired by Schillerian playfulness, free and oriented to bring psychological well-being to its guests.

La lampada **Bul-Bo** appartiene alla serie di arredi disegnati per il Centro Residenziale **Olivetti** a Ivrea (Torino) dallo studio di architettura **Gabetti e Isola** (Roberto Gabetti, Alvaro Gabetti, and Luciano Re) tra il 1968 e il 1971. Il contesto nel quale i progettisti operarono era quello ancora fortemente influenzato dalla mente illuminata di Adriano Olivetti, scomparso pochi anni prima. Con la creazione di Bul-Bo si diede vita ad una lampada giocosa, ironica e funzionale, in perfetta aderenza a quel clima di "ribellione agli schemi" che, nella seconda metà degli anni '60 del Novecento, avrebbe lasciato un'impronta indelebile nei costumi. A 50 anni di distanza, Axolight ripropone questo iconico oggetto d'illuminazione introducendo elementi contemporanei nel rispetto filologico del disegno originale.

Nel 1968 - quando nelle città di mezzo mondo nasceva uno fra i più dirompenti movimenti di massa del '900' e i paesaggi rurali lasciavano definitivamente il passo all'impatto estetico delle fabbriche - lo studio Gabetti e Isola avviava il progetto di realizzazione del Centro Residenziale Olivetti di Ivrea, dando vita a innovative soluzioni residenziali (pensate per i dipendenti della Olivetti, una delle più importanti aziende al mondo del '900) che lasceranno ai posteri l'idea di un nuovo modo di vivere gli spazi.

"Per creare la nuova Bul-Bo, lampada già oggetto di brevetto - spiega il team di Axolight - e applicare a essa materiali e processi produttivi contemporanei, è stato vitale e risolutivo ricorrere a un esercizio di maieutica estremamente emotivo che ci ha portati alla ricostruzione del pensiero progettuale degli autori dell'opera. Aver dato una seconda vita a una lampada così importante per la storia del design moderno - che a cinquant'anni dalla sua prima edizione, rimane incredibilmente forte, non conforme, libera e rivoluzionaria - è un qualcosa che ci inorgoglisce, ci emoziona e arricchisce". "Nello sviluppo della nuova Bul-Bo, Axolight si è posta l'obiettivo di ricreare un'oggetto esteriormente fedele alla sua forma originale, ma in grado di assolvere la sua funzione illuminante in maniera ultra contemporanea".

Bul-Bo fu la bandiera illuminante attorno a cui si radunavano i vari complementi di arredo realizzati dallo studio Gabetti e Isola per Olivetti, non più legati alle pareti, come da tradizione, ma liberi nello spazio.

Nella versione di serie, ogni sistema può accogliere da due o dieci sorgenti di luce. Le singole canaline tubolari saranno lunghe 35, 65 e 100 cm. Il sistema è stato progettato per essere facilmente allungato o accorciato per progetti su misura.

In the standard version, each system can accommodate from two to ten light sources. The individual tubular wire-wise will be 35, 65 and 100 cm long. The system has been designed to be easily lengthened or shortened so that it may adapt to customized projects.

“L'estetica di questa lampada è stata ispirata dall'hishaku, un mestolo per l'acqua in bambù usato in Giappone per lavarsi le mani e purificare di entrare in un santuario. Ha un aspetto semplice e iconico, sorprendentemente calzante l'idea di forma e funzione della lampada Pivot”

Ryosuke Fukusada

“The aesthetics of this lamp was also inspired by the hishaku, a bamboo water scoop used in Japan to wash hands and purify before entering a shrine. It has a simple and iconic appearance, surprisingly fitting the idea of form and function of the Pivot lamp”

CEDMWC00203

CEDMWC00205

influential works in the entire history of mathematics, defines primitive concepts as the point,
the line and the plane.

elements.
The connection is protected by a magnetic lock, ensuring a safe and easy installation and an aesthetically pleasing finish.

Le barre lineari possono contenere o non contenere la sorgente luminosa, sono rotabili a ~360° per permettere, quando luminose, un completo orientamento della luce.

Le barre lineari non luminose hanno una mera funzione architettonale e possono essere usate per il completamento delle forme geometriche desiderate.

Le barre lineari sono installabili su 12 differenti punti del satellite circolare, al fine di ottenere svariati angoli e conseguenti forme geometriche.

È possibile inserire fino a 4 barre lineari per satellite circolare.

The linear elements can be equipped or not, they can be rotated ~360° to allow emission in the preferred direction (with source).

Non-lighting linear profiles, with a mere architectural function, can be used to complete the desired geometric forms.

The linear profiles can be installed in 12 different points of the circular satellites, thus obtaining a variety of angles and consequently different geometries for the linear elements.

Each satellite can host up to 4 different linear profiles.

Le barre lineari possono contenere o non contenere la sorgente luminosa, sono rotabili a $\sim 360^\circ$ per permettere, quando luminose, un completo orientamento della luce.

The linear elements can be equipped with an LED light source or not, they can be rotated $\sim 360^\circ$ to allow orienting the light emission in the preferred direction (when equipped with the light source).

Data la lavorazione artigianale del prodotto ed il particolare processo di finitura, sempre manuale, è possibile riscontrare diversi aspetti e tonalità di finitura tra un prodotto e l'altro che devono essere ritenuti un pregio assoluto del prodotto.

Considering the craftsmanlike manufacturing of the product and the special finishing process, always by hand, you may find different appearances and shades between one product and another and they are to consider as absolute distinction of the item.

Dal rumore al comfort acustico, come farli

Performance

Il rumore è comunemente identificato come un suono non desiderato e disturbante, ad esempio quello generato dal brusio (vociare incomprensibile e continuativo), da un'automobile in movimento, da un trapano, etc.

Il comfort acustico è quella condizione psicofisica di benessere nella quale si trova una persona immersa in un ambiente in cui il rumore è molto contenuto.

Noise is commonly identified as an unwanted and disturbing sound, for example buzzing (an incomprensibile and continuous hum) from a moving car, a drill, etc.

Acoustic comfort is the psychophysical condition of wellbeing a person finds themselves in when they are in an environment where noise is limited.

La misurazione del **Tempo di Riverberazione (RT60)**, ovvero il tempo necessario affinché il rumore diventi impercettibile, consente di valutare il comfort acustico di un ambiente: maggiore è il tempo

The measurement of **Reverberation Time (RT60)**, or the time required for sound to become imperceptible, allows the acoustic comfort to be measured in any given environment: the higher

Noise Rumore

Acoustic comfort Comfort

L'introduzione in un ambiente di fonoassorbenti (quindi in grado dei Tempi di Riverberazione) è il pur senza apportare modifiche si può raggiungere un comfort a

Introducing sound-absorbing ob

L'ambiente nel quale è stata misurata la capacità fonassorbente delle lampade Axolight è quello di seguito rappresentato:

Sono stati misurati, al variare delle frequenze del suono emesso da una sorgente audio, sia i tempi di riverbero dell'ambiente in assenza di lampade fonassorbenti, sia quelli successivi all'introduzione di 1, 2 o 3 lampade fonassorbenti per volta.

È stata così calcolata la riduzione del rumore nell'ambiente.

The environment used to measure the sound-absorbing properties the Axolight lamps is shown below:

The Reverberation Times of the room, with sounds of varying frequencies emitted from an audio source, were measured, first without acoustic lamps, then with 1, 2 or 3 lamps added at a time.

This is how the reduction of sound in the room was calculated.

$$T/A)$$

mento (A) del singolo oggetto (i.e. aneamente conto, delle proprietà li cui l'oggetto si compone, delle sue delle modalità di installazione.

ring the Reverberation Time (RT60) of an enclosed ent both with and without sound-absorbing objects, g into account the difference, it is possible to calculate lency.

o calculate the Reverberation Time (RT60), the Volume losed space (V) and the cumulative Equivalent Sound g Area (A) of all the surfaces and objects present in the ent must be known:

$$= 0,161 \times (V/A)$$

alent Sound Absorbing Area (A) of each single object takes into account the overall sound-absorbing s of the materials the object is made of, as well as its size

Per conoscere le proprietà fonassorbenti di un mero materiale (ma non di un oggetto nel suo complesso) è possibile usare il **Coefficiente di Assorbimento Acustico (α)**, il cui valore può variare fra 0, nel caso in cui tutta l'energia incidente è riflessa, e 1, nel caso in cui tutta l'energia incidente è assorbita. Pertanto, se il valore di α è pari a 5, il 50% dell'energia incidente sulla superficie del materiale è assorbita.

Prodotto fonoassorbente /

	Prodotto conforme ai regolamenti tecnici dell'unione dogandale euroasiatica.	Product in compliant with the technical regulations of the euroasian custom union.
	Prodotto testato e certificato da elettrcal testing laboratories (ETL) accreditato, in conformità con le normative del Nord America e del Canada.	Product tested and certified by eletrical testing laboratories (ETL) in compliance with the North American and Canadian laws.
	Con sorgente luminosa. With light source.	Senza sorgente luminosa. Without light source.

	I dati riportati sono puramente indicativi: è possibile che siano riportati degli errori di stampa. Axo Light può apporre modifiche di qualsivoglia tipo agli apparecchi, ai dati e alle relative istruzioni senza preavviso alcuno. Axo Light non presta garanzia legale relativamente all'accuratezza dei dati riportati nel presente listino.	
	The details given here are intended purely as guidance as errors may have occurred during the printing process. Axo Light may make alterations of any type to the light fittings, data and relevant instructions without notice. Axo Light does not provide legal guarantee regarding the accuracy of the data provided in this price list.	
	CLASSE 3	PSU
	Apparecchio in cui la protezione contro la scossa elettrica si basa sulla alimentazione a bassissima tensione di sicurezza.	Alimentatore. Power Supply Unit.
	Appliance in which protection against electrical shock is guaranteed by the extremely low voltage power supply.	
	Articolo dimmerabile 1-10V. Dimmable 1-10V.	Interfacciabile con sistema DALI. Interfaceable with DALI system.
	220 - 240Vac LED	
	Prodotto con LED integrato a tensione di rete. Product equipped with Integrated LED for the mains voltage.	Misure dei disegni in cm. Schede tecniche e files 3D verranno implementati e resi disponibili nel sito www.axolight.it e axolight.us.
	+LED	Measures of the drawings in cm. Technical sheets and the 3D files will be updated and available at www.axolight.it and axolight.us.
	Prodotto con lampadine LED o convenzionali. Product for LED or conventional light bulbs.	

	I dati nominali di flusso (lm) e di efficienza (lm/W) sono riferiti rispettivamente alle sorgenti LED e alle sorgenti LED più l'assorbimento della PSU.	
	Nominal flux (lm) and efficacy (lm/W) of the products are estimated on the LED sources and the LED sources plus the PSU absorption.	
	CLASSE 2	
	Sistema a doppio isolamento: messa a terra esclusa. Double insulation. Earthing: excluded.	
	Dimmerabile solo con driver dedicato. Dimmable only with dedicated power supply unit.	
	Articolo dimmerabile Push Dimmable Push	
LED	Prodotto per sola lampadina a LED. Product for LED light bulbs only.	
CRI	Indice di resa di colore. Colour rendering index.	

Gli apparecchi Axo Light sono compatibili con lampadine etichettate con le classi energetiche del regolamento ENERGY LABELING eventualmente disponibili in commercio e previa verifica dimensionale. La classe energetica in grassetto è quella della lampadina con cui è venduto l'apparecchio. I prodotti presenti a listino con il simbolo **LED** sono muniti di lampade a LED integrate non sostituibili. Le informazioni qui riportate riguardo le classi energetiche delle lampadine non sono esaustive di tutti i tipi effettivamente reperibili sul mercato dell'Area Economica Europea.

The Axo Light products are compatible with energy-labeled light bulbs available in commerce and provided the dimension verification is made. The energy class in bold is the one of the lamp with which the product is sold. The information reported here regarding the energy classes of the light bulbs is not exhaustive of all the types actually available on the market of the European Economic Area.
